The path of care in international adoption
Francesca Ditifeci

Paper delivered at Santa Croce and Home Renaissance Foundation
Workshop: "The "home factor" between caring for oneself, others, and the
environment", Santa Croce University, Rome, 7 March 2025

The path of care in international adoption
Francesca Ditifeci

Abstract

From the birth of desire to the first encounter with the most desired "other," from the most special journey to the new arrival. It is with the arrival of the new family that the building of the new home begins: language, food, colour, flavours, clothes, climate, smile, tears, falls, hugs, and caresses are some of the fundamental ingredients needed for the new construction. We will go through the crucial points of international adoption in order to tell one of the most beautiful and difficult stories of care and love to make home, to be home.
